EVOLVE ETFs

The Nasdaq-100® is not a tech index.

Investors have treated it as the technology benchmark for four decades. In practice only about half its constituents are technology companies, and those names have driven most of its returns.

46
of the 100 constituents are classified as Technology[1]

68.0%
of index weight sits in those Technology names[1]

89.1%
of the index's return over the past five years has come from them[1]

About half the index is not what investors think it is

The Nasdaq-100 was never designed as a technology index. Launched in 1985, it simply tracks the 100 largest non-financial companies listed on the Nasdaq. But because so many of the world's leading technology firms chose to list there, **it became the default way to buy tech**.

WHAT THE NASDAQ-100 IS ACTUALLY MADE OF

EXAMPLES OF NON-TECH COMPANIES IN THE NASDAQ-100

Walmart Consumer Discretionary	Costco Consumer Discretionary	Amgen Health Care	Linde Basic Materials	Gilead Sciences Health Care	PepsiCo Consumer Staples
Intuitive Surgical Health Care	Vertex Pharmaceuticals Health Care	Booking Holdings Consumer Discretionary	Starbucks Consumer Discretionary	CSX Industrials	

Source: Bloomberg as at September 30, 2026. Sector classification per the Industry Classification Benchmark (ICB).

The technology names have historically driven returns

Technology's weight in the Nasdaq-100 has climbed steadily. Its contribution to index performance has climbed faster, and over every period the two are far apart. **Less than two-thirds of the index has been producing most of the return.**

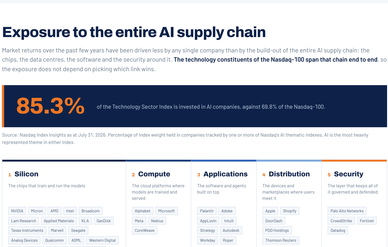

Source: Bloomberg as at September 30, 2026. Average Technology sector weight versus contribution to index performance. Share of index weight is the average of the Technology constituents' month-end index weights across the months in the period. Share of index return is those constituents' cumulative contribution to the index's return over the same months, where each month's constituent contributes its start-of-month index weight multiplied by its total return for that month, compounded forward, divided by the index's cumulative return over the period.

Isolating the technology names changed the outcome

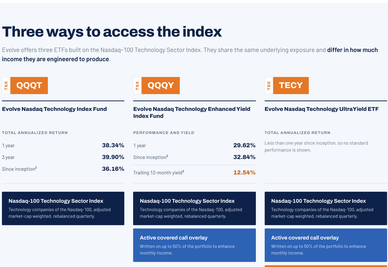

The Nasdaq-100 Technology Sector Index holds only the technology constituents of the Nasdaq-100, adjusted market-cap weighted and rebalanced quarterly. **It has outperformed the parent index over every standard period.**

GROWTH OF $10,000 OVER TEN YEARS

Source: Bloomberg as at September 30, 2026. Total return, September 30, 2016 to September 30, 2026. For illustrative purposes only. The "Growth of $10,000" chart shows the total return of a hypothetical $10,000 investment in the index as at the end of the investment period indicated and is not intended to reflect future values or returns on investment in such securities. The vertical axis begins just below the lowest value shown rather than at zero. It does not reflect fees, expenses or trading costs of any fund.

CALENDAR YEAR TOTAL RETURN (%)

Source: Bloomberg as at September 30, 2026. Calendar year total return, 2016 to 2025, covering the same period as the chart above. Index returns are not investable and do not reflect the fees, expenses or trading costs of any fund. Past performance is not indicative of future results. For illustrative purposes only.

Total return	YTD	1 year	2 year	3 year	5 year	10 year
Nasdaq-100 Technology Sector Index	**36.53%**	**42.82%**	**37.52%**	**43.35%**	**26.46%**	**27.32%**
Nasdaq-100 Index	21.01%	24.00%	23.96%	28.31%	16.56%	21.16%
DIFFERENCE	**+15.52%**	**+18.82%**	**+13.56%**	**+15.04%**	**+9.89%**	**+6.16%**

Source: Bloomberg as at September 30, 2026. Periods of one year and longer are annualized. Index returns are not investable and do not reflect the fees, expenses or trading costs of any fund. Past performance is not indicative of future results.

It leads the other technology benchmarks too

Once the case for pure technology exposure holds, the next question is which technology index to own. **Against the two main S&P technology benchmarks, the Nasdaq-100 Technology Sector Index has led over every period shown.**

TOTAL RETURN VERSUS TECHNOLOGY BENCHMARKS

Total return	YTD	1 year	3 year	5 year	10 year
Nasdaq-100 Technology Sector Index NDXT TOTAL	**36.53%**	**42.82%**	**43.35%**	**26.46%**	**27.32%**
S&P Technology Select Sector SPTR	36.48%	39.57%	34.61%	22.25%	24.83%
S&P North American Technology SPNXTR	33.13%	37.64%	39.47%	21.34%	24.55%

Source: Bloomberg as at September 30, 2026. For illustrative purposes only. Periods of one year and longer are annualized. Index returns are not investable and do not reflect the fees, expenses or trading costs of any fund. Past performance is not indicative of future results.

Exposure to the entire AI supply chain

Market returns over the past few years have been driven less by any single company than by the build-out of the entire AI supply chain: the chips, the data centres, the software and the security around it. **The Technology constituents of the Nasdaq-100 span that chain end to end**, so the exposure does not depend on picking which link wins.

85.3% of the Technology Sector Index is invested in AI companies, against 69.8% of the Nasdaq-100.

Source: Nasdaq Index Insights as at July 31, 2026. Percentage of index weight held in companies tracked by one or more of Nasdaq's AI thematic indexes. AI is the most heavily represented theme in either index.

1 Silicon
The chips that train and run the models

NVIDIA · Micron · AMD · Intel · Broadcom · Lam Research · Applied Materials · KLA · SanDisk · Texas Instruments · Marvell · Seagate · Analog Devices · Qualcomm · ASML · Western Digital · Arm · Cadence · Synopsys · MicroStrategy · Power · Astera Labs · Teradyne · NXP · Microchip

2 Compute
The cloud platforms where models are trained and served

Alphabet · Microsoft · Meta · Nebius · CoreWeave

3 Applications
The software and agents built on top

Palantir · Adobe · AppLovin · Intuit · Strategy · Autodesk · Workday · Roper

4 Distribution
The devices and marketplaces where users meet it

Apple · Shopify · DoorDash · PDD Holdings · Thomson Reuters

5 Security
The layer that keeps all of it governed and defended

Palo Alto Networks · CrowdStrike · Fortinet · Datadog

Three ways to access the index

Evolve offers three ETFs built on the Nasdaq-100 Technology Sector Index. They share the same underlying exposure and **differ in how much income they are engineered to produce**.

QQQT

Evolve Nasdaq Technology Index Fund

TOTAL ANNUALIZED RETURN

1 year	**38.34%**
3 year	**39.90%**
Since inception[2]	**36.16%**

Nasdaq-100 Technology Sector Index
Technology companies of the Nasdaq-100, adjusted market-cap weighted, rebalanced quarterly.

EvolveETFs.com/QQQT

QQQY

Evolve Nasdaq Technology Enhanced Yield Index Fund

PERFORMANCE AND YIELD

1 year	**29.62%**
Since inception[3]	**32.84%**
Trailing 12-month yield[4]	**12.54%**

Nasdaq-100 Technology Sector Index
Technology companies of the Nasdaq-100, adjusted market-cap weighted, rebalanced quarterly.

Active covered call overlay
Written on up to 50% of the portfolio to enhance monthly income.

EvolveETFs.com/QQQY

TECY

Evolve Nasdaq Technology UltraYield ETF

TOTAL ANNUALIZED RETURN

Less than one year since inception, so no standard performance is shown.

Nasdaq-100 Technology Sector Index
Technology companies of the Nasdaq-100, adjusted market-cap weighted, rebalanced quarterly.

Active covered call overlay
Written on up to 50% of the portfolio to enhance monthly income.

Modest leverage, up to 1.33x
Amplifies the income and total-return potential. Leverage increases risk.

Source: Evolve ETFs as at September 30, 2026. Index characteristics as at September 30, 2026. Past performance is not indicative of future results.

1. Source: Bloomberg as at September 30, 2026. The three figures in the opening summary are constituent counts and index weights as at that date, and Technology's contribution to index performance over the five years to it.
2. Performance since inception of QQQT on July 11, 2023; QQQY on October 3, 2023.
3. Trailing 12-month yield represents the yield an investor would have received if they held the fund over the past twelve months, based on the Net Asset Value (NAV) as at September 30, 2026. It is calculated as the sum of all the regular distributions amount over the past twelve months, and then divided by the NAV calculated on September 30, 2026.

DISCLAIMER

Published on October 5, 2026.

Evolve Funds Group Inc. is the investment fund manager and portfolio manager. "Evolve Nasdaq Technology Index Fund" (QQQT"), Evolve Nasdaq Technology Enhanced Yield Index Fund ("QQQY") and Evolve Nasdaq Technology UltraYield ETF ("TECY") are offered by Evolve Funds Group Inc. and distributed through authorized dealers.

The information contained herein is a general description and is not intended to be specific investment advice to any particular investor nor intended to be investment or tax advice. You should not act or rely on the information contained herein without seeking the advice of an appropriate professional advisor. The information contained herein is intended for informational purposes as a summary only, does not constitute an offer to sell any securities or a legally binding obligation, it is qualified entirety by, and should be read in conjunction with, the more detailed information appearing in the prospectuses found on the Evolve Funds Group Inc website at https://evolveetfs.com/.

Leverage increases risk.

Commissions, trailing commissions, management fees and expenses all may be associated with exchange traded funds (ETFs) and mutual funds. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. ETFs and mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The rates of return shown in the table are used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the ETF and mutual fund or returns on investment in the ETF and mutual fund.

Certain information contained herein is obtained from third-parties. Evolve Funds Group Inc. believes such information to be accurate and reliable as of the date hereof, however, we cannot guarantee that it is accurate or complete or current at all times. The information provided is subject to change without notice.

Certain statements contained herein are forward-looking. Forward-looking statements ("FLS") are statements that are predictive in nature, depend upon or refer to future events or conditions, or that include words such as "may," "will," "should," "could," "expect," "anticipate," "intend," "plan," "believe," or "estimate," or other similar expressions. Statements that look forward in time or including anything other than historical information are subject to risks and uncertainties, and actual results, actions or events could differ materially from those set forth in the FLS. FLS are not guarantees of future performance and are by their nature based on numerous assumptions. Although the FLS contained herein are based upon what Evolve Funds Group Inc. and the portfolio manager believe to be reasonable assumptions, neither Evolve Funds Group Inc. nor the portfolio manager can assure that actual results will be consistent with these FLS. The reader is cautioned to consider the FLS carefully and not to place undue reliance on FLS. Unless required by applicable law, it is not undertaken, and specifically disclaimed that there is any intention or obligation to update or revise FLS, whether as a result of new information, future events or otherwise.
